Culligan® Hi-Flo® 50 Series Industrial Dealkalizer Systems

Reduced Alkalinity for High-Volume Applications.

The Culligan® Hi-Flo® 50 dealkalizer reduces alkalinity in water used for commercial and industrial applications. The Hi-Flo® 50 dealkalizer is a posttreatment option for your Culligan® water softening system that further reduces contaminants (Contaminants may not necessarily be in your water.) in the water that affect the performance and efficiency of water using equipment. The scalable configuration helps meet your growing needs for high-quality
